INCIDENT MANAGEMENT SITUATION REPORT TUESDAY, JULY 10, 2001 - 0530 MDT NATIONAL PREPAREDNESS LEVEL 2

#### CURRENT SITUATION:

Three new large fires were reported, one each in Colorado, Oregon, and Washington. Four large fires reached containment, two each in Oregon and Wyoming. Initial attack activity was heavy in Rocky Mountain and Southwest Areas, moderate in Eastern, Northern California, and Southern Areas, and light elsewhere. Very high to extreme fire indices were reported in Arizona, California, Colorado, Idaho, Oregon, Nevada, New Mexico, Utah, Washington, and Wyoming.

## EASTERN GREAT BASIN AREA LARGE FIRES:

GREYS RIVER COMPLEX, Bridger-Teton National Forest. A Type 2 Incident Management Team (Broyles) is assigned. This lightning caused complex, comprised of the Deer, Fawn, Murphy Creek, and Blind Bull fires, is 14 miles southeast of Alpine, WY. Large concentrations of fuel continue to burn out in the interior. Higher relative humidity and cloud cover are assisting containment efforts.

SUPERNATURAL COMPLEX, Zion National Park. This lightning caused complex, comprised of the Wynonpits, Little Wyno, and Crazy Quilt fires, is 14 miles northeast of Hurricane, UT. This will be the last report unless significant activity occurs.

## ROCKY MOUNTAIN AREA LARGE FIRES:

DEER CREEK, Grand Mesa-Uncompangre-Gunnison National Forest. This lightning caused fire is burning 25 miles southeast of Grand Junction, CO. Steep terrain is hampering containment efforts.

KELLOG, Craig District, BLM. This lightning caused fire is 12 miles northwest of Meeker, CO within the Black Mountain Wilderness Study Area. Assigned resources have begun mopup of the perimeter.

#### NORTHWEST AREA LARGE FIRES:

Incident 095, Northeast Washington State. A Washington State Department of Natural Resources Type 2 Team (Dunton) is assigned. This human caused fire is 15 miles south of Twisp, WA. Active fire behavior was observed.

UMF = Umatilla National Forest, USFS

#### OUTLOOK:

Monsoonal moisture over the Great Basin and a weak upper level disturbance over Nevada will bring partly cloudy skies with scattered, wet afternoon and evening showers and thunderstorms. High temperatures will be in the 60's and 70's in the mountains, in the 80's and 90's in the valleys and 95 to 110 in the southern deserts. Minimum relative humidity will range from 15 to 30 percent, except for southern Idaho which will be in the upper teens. Winds will be variable in Utah and southwest in Nevada at 5 to 15 mph.

Colorado and Wyoming will have monsoonal moisture over the area, bringing partly cloudy skies with scattered afternoon and evening thunderstorms. Isolated, widely scattered storms are expected along the western slope of the Rocky Mountains in Colorado and in the south and central portions of Wyoming. High temperatures will be 65 to 75 in the mountains and 80 to 90 in the valleys. Minimum relative humidity will range from 20 to 30 percent and winds will be variable at 5 to 15 mph.

An upper level disturbance moving into the Northwest with a southerly flow of monsoonal moisture will bring partly cloudy skies. Wet, scattered afternoon and evening thunderstorms are expected in Oregon and the southern and eastern portions of Washington. High temperatures will be 70 to 85 on the west side of the Cascade Range and 85 to 95 on the east. Minimum relative humidity will range from 10 to 20 percent on the east side of the Cascade Range and above 35 percent on the west side. Winds will be southwest to northwest at 8 to 18 mph, except for gusts of up to 40 mph near thunderstorms.
